Here goes the abstract

About the Dataset Something about the dataset. What it is, where to find it (link), why we chose it...

EDA: Exploratory Data Analysis Meaning of the data. Some visualization

Data Preparation Feature selection (and why). How we encode categorical.

Dataset Split How we split the dataset (train/test)

Models Model 1: ... Presentation Training Validation ... some more subsubsections

Model 2: ... Presentation Training Validation ... some more subsubsections (like results)

... + other models (last model: Voting Classifier)

AUCs

AutoML (+ new AUC, invluding AUC)

Best model: model n Why the best PCA Does it improve?
